STUDENT ASSISTANT 2

UC DAVIS BODEGA MARINE LABORATORY

About this Job

Student Assistant 2 (3 positions available in summer 2019)

The Student Assistants are temporary summer hires to assist Dr. Steven Morgan and researchers in his laboratory with a variety of ongoing research projects in the fields of marine ecology and biological oceanography.

Responsibilities. The Student Assistant will assist with routine activities in the laboratory and field, including helping to 1) quantitatively survey fishes inside and outside marine protected areas in the coastal ocean, 2) deploy and retrieve robot larvae in the coastal ocean, 3) survey larvae across fronts in the coastal ocean, 4) process plankton samples in the laboratory, 5) enter data into spreadsheets and 6) maintain the cleanliness of the laboratory.

Qualifications. High school diploma. Must enjoy working in the field, including boats, and tolerate working in inclement weather, such as during cold, foggy or windy days. Basic fitness and agility are needed to assist with routine field surveys and experiments. Ability to work with hand tools, microscopes, and sampling gear to conduct studies in the laboratory and field. Familiarity with computers and basic typing skills. Positive attitude, team player, responsible, punctual and reliable. Good work ethic, attention to detail, and oral and written communication skills.

Compensation: $12.00/hour, 40 hours/week

Required: Resume + cover letter
